

DOCK SEALS

When rain, sleet, snow or extreme temperature changes occur, having a reliable loading dock seal can make a world of difference. Serco loading dock seals help keep out the elements that can hinder your dock operations while maintaining the ideal climate to keep things running smoothly.

Serco's trusted dock seals help keep your dock productive and safe for workers, and they play a critical role in keeping cooled air inside climate-controlled and cold storage facilities, for superior energy efficiency. Our loading dock seals feature the innovative Serco Steel framing, which comes with a 5-year warranty and provides long-term protection and reliability.

SERCO SEALS: THE SMART SOLUTION.

SERCO SEALS ARE A SMART INVESTMENT FOR ANY DOCK.

They provide a higher level of employee comfort, save on energy costs by maintaining temperature and environmental control, improve safety by decreasing the amount of slips, falls and equipment skids, and protect both the loading dock and the product being moved from snow, ice, rain, dirt and debris.

DOCK SEAL DESIGN FEATURES

- Serco Steel framing, backed with a 5-year warranty, offers long-term protection and reliability
- Large selection of durable coated fabrics
- Optional flame-retardant foam and fabric for ultimate insulation benefits

SERCO S-600 STATIONARY HEAD PAD DOCK SEAL

PROVIDES THE TIGHTEST POSSIBLE SEAL.

The Serco S-600 Stationary Head Pad Dock Seal is typically ideal for smaller doors (9' x 9' or less). The S-600 seals automatically as the trailer is backed against the foam pads.

DESIGN FEATURES

- Roll-formed galvanized steel framing warranted for 5 years against rotting, splitting or cracking.
- Endurance-tested foam core is continuously bonded to frame surface with flexible, non-flammable adhesive.
- A wide selection of durable coated fabrics provides maximum durability.

SERCO S-700 HEAD CURTAIN DOCK SEAL

THE IDEAL SOLUTION FOR TALLER DOORWAYS.

The Serco S-700 Head Curtain Dock Seal will accommodate a variety of trailer heights and is designed for doors that are 9' tall or over.

DESIGN FEATURES

- Roll-formed galvanized steel framing warranted for 5 years against rotting, splitting or cracking.
- Endurance-tested foam core is continuously bonded to frame surface with flexible, non-flammable adhesive.
- A wide selection of durable coated fabrics provides maximum durability.
- Adjustable head curtain option.

SERCO S-1000 ULTRA SEAL® DOCK SEAL

A PATENTED, PROVEN DESIGN PROVIDES UNIQUE PROTECTION FOR YOUR DOCK.

The Serco S-1000 Ultra Seal's patented design provides the insulating benefits of a dock seal and full trailer access like a dock shelter. The one-piece, diagonal-cut foam construction, with internal retention straps, enhances foam memory and retention while looking good on your dock for years. Ultra Seal seals rear hinge gap on trailers without obstructing doorway.

DESIGN FEATURES

- Stationary header ideal for smaller doors.
- Dual guide stripes for 96" and 102" wide trailers.
- Wear pleats on head corners and reinforced bottom corners.

SERCO S-800 ADJUSTABLE HEAD PAD DOCK SEAL

A TIGHT SEAL FOR A WIDE VARIETY OF TRAILER HEIGHTS.

The S-800 Adjustable Head Pad Dock Seal can be manually positioned within a 48" range and is an excellent choice for sealing a full range of trailer heights.

DESIGN FEATURES

- Patented, adjustable head pad system operates utilizing an easy-release lever.
- Adjustable spring-tension system provides for adjustment of counterbalance and horizontal tilt for smooth, jam-free operation.
- 18" high foam head pad is mounted on a steel pan, which travels in slide tracks.
- Roll-formed galvanized steel framing (5-year warranty).
- High-resilient foam core protected by three layers of durable coated fabric.
- A wide selection of durable coated fabrics provide maximum durability and reliability.

SERCO S-2000 ULTRA SEAL® DOCK SEAL

THE ULTIMATE ENERGY SEAL FOR THE CLIMATE-CONTROLLED LOADING DOCK.

The Serco S-2000 Ultra Seal utilizes the same versatile design with an adjustable head curtain that enhances the seal's effectiveness by accommodating a variety of trailer heights.

DESIGN FEATURES

- Adjustable head curtain for varying trailer heights.
- Inflatable header option provides tight seal without impeding trailer access at the top.

SERCO S-2500G GUARDIAN DOCK SEAL

DRAMATICALLY REDUCES PRESSURE AND ABRASION ON YOUR DOCK SEAL.

Designed to make your dock seal last at least twice as long, the Guardian features a two-piece head pad system with a mobile front pad. This durable head pad slides up to 6" with the trailer as it moves for load weight changes, air ride suspensions or yard spotting tractors.

#2: Yard jockey backs trailer into dock causing significant head pad compression.

#3: Guardian's two-piece floating head pad and wear pleat system accommodates movement as trailer is lowered.

Guardian is the ideal solution for air-ride suspension trailers, which can move up and down as much as 8" during loading/unloading.

When a stationary head pad and wear pleat system is utilized, after time, movement of the trailer causes damage and can lead to detachment resulting in an unprotected wall surface and loss of seal.

4" exposure wear pleating moves with the trailer, extending the life of the fabric in key wear areas.

SERCO S-3000L L-PAD DOCK SEAL

KEEP THE ELEMENTS OUT FOR A SAFE AND PRODUCTIVE DOCK.

The Serco S-3000L L-Pad has a unique design that provides the insulating benefits of a dock seal plus the full-access of a shelter. The side pads are foam-filled and uniquely designed to provide the flexing action of a shelter and the fit of a seal. The high-density foam core provides full recovery to the stored position.

SERCO S-3000HL L-PAD DOCK SEAL

The Serco S-3000HL L-Pad has a unique design that provides the insulating benefits of a dock seal plus the full access of a shelter. The side pads are foam-filled and uniquely designed to provide the flexing action of a shelter and the fit of a seal. Hood curtain splits offer load relief and higher clearance. Fiberglass stays add stiffness to hood to prevent sagging.

AVAILABLE FABRICS

XL-100 Heavy-duty polyester-based fabric with a polymer blend coating on both sides resulting in the highest levels of puncture and tear resistance.

40oz. Hypalon® Nylon woven base with a Hypalon coating on both sides.

Note: Hypalon® is a registered trademark of E. I. DuPont de Nemours & Co.

Note: Not all fabrics are available in all colors. Please check with your local Serco distributor to verify color availability in your choice of fabric. Due to printing variances, actual fabric colors may differ.

40oz. Vinyl Woven polyester-based fabric with a vinyl coating on both sides.

22oz. Vinyl Woven polyester-based fabric with a vinyl coating on both sides.

SERCO S-900DD DRYDOCK®

The Serco DryDock keeps rain and external moisture out of the loading/unloading area with an ingenious “wiper” pad that engages the trailer at the door — ingenious because it works so well and yet is so simple, it requires hardly any maintenance at all.

DESIGN FEATURES

- Automatic position, no manual activation necessary.
- Heavy-duty galvanized steel channel head frame.
- Translucent fiberglass raked head frame for fast water drainage.
- High-resilient foam core protected by three layers of durable coated fabric.
- Weighted side covers provide extra protection for the dock area.
- Rugged support bracket for mounting over existing equipment.
